### OPERATION

1. Fill with any type of gasoline—Unleaded Preferred.
2. Tighten Filler Plug and close Valve.
3. Push pump Handle in and turn several turns to left to open Pump Check.
4. Pump 12-25 strokes with thumb over Pump Handle hole.
5. Push Pump Handle all the way in and turn to right until tight.
6. Open Valve one quarter turn and insert lighted match under Mantel.
7. Allow to burn to bright light and gradually open Valve full—avoid flaming.
8. Pump several strokes as per 3, 4 and 5.

CAUTION: EXCESSIVE STARTING PRESSURE WILL BRAKE THE MANTLE.

### LIGHTING NEW MANTLE

1. Tie mantle around the groove in burner cap and cut off extra string.
2. Distribute the fabric evenly around the burner cap.
3. Light bottom of mantle evenly with match.
4. Let mantle burn until only ash remains.
5. Allow mantle to cool several minutes after it burns off.

### MAINTENANCE

1. Generator should last 100-200 hours.
2. Clean Generator Tip with Pricker on wrench after 50-55 hours operation (do not use Pricker unnecessarily).
3. When replacing Generators remove protecting Cap and Screw.
4. Wash Fount out with gasoline when changing Generator.
5. When attaching new Mantle distribute folds evenly.
6. Keep Pump Leather soft with light oil.

PRECAUTION: Always provide good ventilation, particularly when burning leaded gasoline.

## CAUTIONS

- Read carefully all instructions -- on fuel and how to pump and light.
- Pump on stove has an air lock; unscrew lock before pumping; screw lock closed after pumping to prevent leakage.
- Burner valve must be opened wide after flame burns blue otherwise tank pressure will drop.
- Replacement parts (in parts tube and in pump barrel) furnished with this stove will facilitate stove repairs in the field, which should maintain good performance and increase useful life of stove.
- When using leaded gasoline, clean underside of round burner plate after each 10 hours of operation.
- Clean and empty tank completely after each 20 hours of operation.

520/523 Military Stove  
\$3.00

# USE ONLY KEROSENE

237B \$3.00

- ← ON                      LIGHT                      OFF →  
STOVE, COOKING, GASOLINE, M-1950, ONE BURNER
1. FILL 3/4 FULL CLEAN GASOLINE PUMP 10 STROKES.
  2. TURN VALVE EXTREME LEFT (ON) 3 SECONDS, THEN (OFF) POSITION APPLY MATCH AND ALLOW TO BURN ONE MINUTE.
  3. OPEN VALVE TO VERTICAL (LIGHT) POSITION UNTIL FRAME TURNS BLUE, THEN OPEN FULL (ON) PUMP 10 STROKES.
  4. SPARE PARTS ARE CONTAINED IN PUMP PLUNGER.
- CAUTION: WHEN USED IN CONFINED QUARTERS PROVIDE ADEQUATE VENTILATION.

M-1950 ( 536 ) Pocket Stove

**MAINTENANCE:** — (1) GENERATOR SHOULD LAST 100-200 HOURS.  
 (2) CLEAN GENERATOR TIP WITH PRICKER ON WRENCH AFTER 50-75 HOURS OPERATION (DO NOT USE PRICKER UNNECESSARILY).  
 (3) WHEN REPLACING GENERATORS REMOVE PROTECTING CAP AND SCREW.  
 (4) WASH FOUNT OUT WITH GASOLINE WHEN CHANGING GENERATOR.  
 (5) WHEN ATTACHING NEW MANTLE DISTRIBUTE FOLDS EVENLY  
 (6) KEEP PUMP LEATHER SOFT WITH LIGHT OIL.  
**PRECAUTION:** — PROVIDE GOOD VENTILATION WHEN BURNING LEADED GASOLINE.

**OPERATION:** — (1) FILL WITH ANY TYPE OF GASOLINE  
 (2) TIGHTEN FILLER PLUG AND CLOSE VALVE.  
 (3) PUSH PUMP HANDLE IN AND TURN SEVERAL TURNS TO LEFT TO OPEN PUMP CHECK.  
 (4) PUMP 15-25 STROKES WITH THUMB OVER PUMP HANDLE HOLE.  
 (5) PUSH PUMP HANDLE ALL THE WAY IN AND TURN TO RIGHT UNTIL TIGHT.  
 (6) OPEN VALVE ONE QUARTER TURN AND INSERT LIGHTED MATCH UNDER MANTLE.  
 (7) ALLOW TO BURN TO BRIGHT LIGHT AND GRADUALLY OPEN VALVE FULL — AVOID FLAMING.  
 (8) PUMP SEVERAL STROKES AS PER (3), (4) AND (5).

**LIGHTING NEW MANTLE:**

- TIE MANTLE AROUND THE GROOVE IN BURNER CAP AND CUT OFF EXTRA STRING.
- DISTRIBUTE THE FABRIC EVENLY AROUND THE BURNER CAP.
- LIGHT BOTTOM OF MANTLE EVENLY WITH MATCH.
- LET MANTLE BURN UNTIL ONLY ASH REMAINS.
- ALLOW MANTLE TO COOL SEVERAL MINUTES AFTER IT BURNS OFF.
- CORRECT AIR PRESSURE IS NECESSARY TO PROPERLY FORM THE MANTLE.
- CAUTION: AVOID EXCESSIVE STARTING PRESSURE.

**AGM Military \$6.00**  
**Set of 3**

**— CAUTION —**  
 USE ONLY CLEAN, WHITE, NON-LEADED GASOLINE IN THIS LANTERN.  
 READ ALL STARTING INSTRUCTIONS.  
 AFTER MANTLES BURN BRIGHT, OPEN CONTROL VALVE AS FAR AS POSSIBLE.  
 ADD SEVERAL STROKES OF AIR.  
 AFTER USING PUMP, CLOSE STEM TIGHT.  
 CLEAN AND EMPTY FOUNT COMPLETELY AFTER EACH 50 HOURS OF OPERATION.
